Allow 1" min. clearance at rear for proper air circulation and water/electrical connections
Allow 3/8" min. clearance at sides and top for ease of installation
When installing directly adjacent to wall, sufficient handle clearance required where handle may make contact with wall, to allow for 90° door opening*

* When installing refrigerator adjacent to wall, cabinet or other appliance that extends beyond front edge of unit, 20" minimum clearance recommended to allow for optimum 140° door swing, providing complete crisper access and removal. *(Absolute 3" minimum clearance will ONLY allow for 90° door swing which will provide limited crisper access with restricted removal.)*

***NOTE: For planning purposes only. Always consult local and national electric and plumbing codes. Refer to Product Installation Guide for detailed installation instructions on the web at frigidaire.com.***
